

TOPCALF TRIO CALF HUTCH

The Topcalf Trio calf hutch offers space for 3 calves. The Trio calf hutch is designed so that it can easily be moved, using a loader. The Topcalf Trio calf hutch offers comfort to the calves and to the farmer.

The galvanized frame of this calf hutch ensures a long product lifespan and due to the solid plastic walls and the removable slatted floors, the Trio calf hutch is very easy to clean. The separation walls are removable, which make it possible to create a small group housing. This way, the calves can get accustomed to living in a group. The Trio calf hutch is standardly equipped with an isolated roof and with sliding panels at the back of the hutch to control the climate inside. Furthermore, the Topcalf Trio calf hutch is standardly equipped with divisible front gates, lighting and electricity.
